

Encoder 4G Aerial Booster

Useful for clients in poor 4G areas

Instructions.

1. The external Aerial will be able to boost 4G reception by around 10-20%
2. Unscrew the existing 4G aerial and screw in the cable from the external Aerial
3. The Aerial base is magnetic so can be stick to any magnetic metal surface. Alternatively stick or place on top of the FrogBox case or attach to the FrogBox Mast for best results
